

Urine Drug Screen (Level 3)

This test incurs an out of pocket fee that is required to be paid at time of collection unless a third party has been nominated. If you nominate a third party to pay, you must provide TML Pathology with a written statement (on letter-headed paper) from the third party clearly stating they will accept the costs.

The collection will not proceed without payment.

What to Expect

- Photo ID must be shown to the collector for the collection to proceed.
- You will need to sign all tamper evident labels, seals and forms. Please follow collectors' instructions on where to sign.
- Forms asking about your current medications and other personal information will be given to you to complete. You must complete any forms presented to you.
- You will need to be in the presence of the collector until the last sample is sealed in a tamper evident bag. Please be patient and wait until the collector instructs you to leave.

Sample Collection – General Steps

1. The collector will ask you to remove coats/jumpers and to empty your pockets. All personal belongings will be left outside the collection room.
2. You will be asked to wash your hands prior to producing a sample.
3. A coloured solution will be added to the toilet. Water taps and soap will be made tamper evident (i.e. a paper bag taped over the taps).
4. A sample collection cup will be provided for you to submit a minimum 40mL of urine.
The collection staff member waits outside the cubicle with the door slightly ajar whilst you urinate.
5. Once finished, the sample cup is handed to the collector. The collector observes the toilet prior to flushing.
6. The urine will be temperature tested. If the temperature is outside 33-38 °C, or anything unusual is noted of the urine, another sample will be required.

Staff and patients need to work and be cared for in a safe environment. Violence and verbal abuse will not be tolerated.

Find a collection centre.
